Have you experienced types of unwanted attention in digital spaces?

Do online harassment or the fear of it shape your digital behavior?

How does your (gender) identity influence what content you create and share on social media?

What role does your gender play in how you handle conflict or confrontation online?

How do you decide what personal information to share in your online profiles?

Have you ever changed how you present yourself online to avoid harassment?

Do you feel represented in game characters, storylines, or design?

What character creation and avatar choices do you make in games and virtual spaces?

How do you engage with political content and activism online?

How do you handle negative comments or reactions related to your (gender)identity on social media?

How do you think reporting and moderation systems treat different gender identities?

Have you ever defended someone who was attacked in comments or chats?

Describe the role models or inspiring figures you've found in digital/tech spaces.

What impact does seeing diverse genders and sexualities representation have on your online experience?

How do you see yourself reflected (or not) in digital technology marketing and imagery?

What changes would make digital platforms feel more inclusive to all gender identities?

What messages about gender and technology did you receive growing up?

What role does your identity play in how you seek help with technical issues?

Have you ever experienced that your technical abilities were judged based on your gender?

Describe how your gender has influenced your journey in learning digital skills.

How does your gender expression online compare to how you present yourself in person?

Do you feel pressure to look a certain way in video calls or online photos?

Do you choose profile pictures that clearly show your gender, or do you prefer ambiguity?

How do various platforms' algorithms seem to categorize you based on gender?
